

## Year 3 Autumn 1 Homework Project

We would like to invite you to create a project about one of our topics from this half term and bring it into school on **Monday 23<sup>rd</sup> October** to show your classmates!

You could create a PowerPoint presentation, an interactive poster, a 3D model or even a comic strip! It is completely your choice how you decide to present your learning. Please note, if you decide to create a PowerPoint presentation, this will need to be emailed in advance to the Y3 homework project email address (this will be shared in the near future). Alternatively, you could save it to a USB stick and bring this into school.

This half term, our topic is called 'The Secrets of the Stone Age'. Some of the things we are learning about are:

- The Stone Age in History
- Andy Goldsworthy in Art
- Rocks in Science
- Playing and performing percussion in Music.

Some ideas:

- Explain the rock cycle using chocolate! You could take photos and make a poster to share with your classmates.
- Create a PowerPoint presentation all about the Stone Age.
- Create your own art work using natural materials from your garden or an outside space.
- Create an informative poster about the different types of rocks.
